

```
public class TicketPrinter extends Observer{

    public TicketPrinter() {

    }

    public void notif(){

    }

    public void onNotif(int price, String text){

        this.discount= price;

        System.out.println("price updated");

        System.out.println("print receipt");

        System.out.println(mm/dd/yyyy);

    }

    System.out.println("print confirmation");

    }

}
```
